

## CHAPTER 1

# Historical aspects of laparoscopic hernia repair

The Age of Alexandria .....	1
The Dark Age .....	2
The Resurrection .....	2
The New Dawn .....	3
The Age of Minimal Access Surgery .....	6

## CHAPTER 2

# Hernia repair by minimal access surgery

Advent of laparoscopic procedures .....	9
Groin hernia repair .....	10
Ventral hernia repair .....	14

## CHAPTER 3

# Endoscopic anatomy

Anatomy and embryology of the anterior abdominal wall .....	17
Endoscopic groin anatomy .....	24

## CHAPTER 4

# SGRH\* classification for endoscopic repair of hernias

Classification systems for groin hernia .....	34
SGRH classification .....	35
SGRH classification for TEP repair of groin hernia .....	35
SGRH classification for TEP repair of abdominal wall hernia .....	37

## CHAPTER 5

# Equipment and instruments

Telescope .....	40
Endovision camera .....	41
Light source .....	42
Light cable .....	42
Video monitor .....	43
CO <sub>2</sub> insufflator .....	43
Suction-irrigation system .....	44
Energy sources .....	44
Mechanical instruments .....	44

## CHAPTER 6

# Prosthetics and fixation devices

Prosthetic materials for hernia repair .....	46
History of prosthetic biomaterials .....	47
The ideal prosthesis .....	48
Prosthetic biomaterials in current use .....	49
Fixation of the mesh .....	55
Helical tacks and fasteners .....	55
Sutures .....	57
Staples .....	57
Surgical glue (n-butyl-2-cyanoacrylate) .....	57
Newer fixation devices .....	58

## CHAPTER 7

# Patient management—SGRH\* approach

Admission and counselling .....	62
Special nursing .....	63
Computerized database .....	64
Rigorous audit .....	64
Discharge and follow-up .....	64

## CHAPTER 8

# Anaesthesia for endohernia repair

Pathophysiological changes during endoscopic hernia repair.....	66
Position of the patient.....	66
Insufflation of exogenous gas .....	67
Carboperitoneum and increased intra-abdominal pressure .....	68
Preanaesthetic assessment .....	68
Premedication.....	69
Monitoring .....	69
Choice of anaesthetic technique .....	70
General anaesthesia .....	70
Regional anaesthesia.....	70
Local anaesthesia .....	72
Complications .....	73

CHAPTER 9

# Total extraperitoneal repair of groin hernias

- Principles of TEP repair ..... 77
- Advantages of TEP repair ..... 77
- Patient selection ..... 77
- Preoperative preparation ..... 78
- Operation theatre layout ..... 79
- Operative technique ..... 80
- Port placement ..... 82
- Dissection of the extraperitoneal space ..... 83
- Mesh preparation and fixation ..... 89
- Special situations ..... 92
- Postoperative care ..... 93

## CHAPTER 10

# Transabdominal preperitoneal repair of groin hernias

Anatomy .....	94
Patient selection .....	95
Operative technique .....	96
Complications .....	99

## CHAPTER 11

# Trouble-shooting in groin hernia repair

Creation of the preperitoneal space .....	101
Port placement .....	102
Pneumoperitoneum .....	103
Identification of anatomical landmarks .....	103
Treatment of the sac .....	106

## CHAPTER 12

# Conversion and complications in total extraperitoneal repair

Conversion .....	108
Complications .....	109
Intraoperative complications: Prevention and management .....	109
Postoperative complications .....	112
Lessons learnt .....	113

## CHAPTER 13

# Laparoscopic repair of ventral and incisional abdominal wall hernias

Types of abdominal wall hernias .....	115
Principles of ventral hernia repair .....	117
Patient selection .....	117
Special situations .....	118
Instrumentation .....	120
Operation theatre layout.....	122
Port placement and operative technique .....	122
Postoperative care .....	126
Precautions .....	127

## CHAPTER 14

# Trouble-shooting in repair of ventral and incisional abdominal wall hernias

Safe intraperitoneal access .....	129
Operation theatre layout and port placement .....	130
Reduction of the contents of the hernial sac .....	132
Adhesiolysis .....	133
Introduction of the mesh .....	134
Positioning and fixation of the mesh .....	135
Omental cover .....	136
Conversion .....	136
Laparoscopically assisted approach for repair of massive abdominal wall hernia .....	137
Complications of laparoscopic ventral hernia repair .....	138
Surgical 'pearls' .....	142
